Increasing the sources of financial protection for the population

The fact that the Republic of Uzbekistan is declared a social state in the Constitution adopted in January indicates that the main financial assets are being directed to the social sphere. Developed countries have lived as a social state for centuries, resulting in a year-on-year increase in the average population income and guaranteed population otherwise, the state has introduced a system of social protection. The average one-year salary in Switzerland is \$ 64,109, the average one-year income in the Netherlands is \$ 54,262 per person, the average in the United Arab Emirates Income is \$ 44,700, average income in Denmark is \$ 55,252 a year, South Careya is \$ 39,472 a year, finland's average income is \$ 44,111 a year The average annual income in Spain is \$ 38,761, the average annual income in Switzerland is \$ 44,196, and the average annual income in Norway The fact that income is \$ 29,434 (U.S.) is reflected in the growing population well-being in these countries. From a geographical point of view, these countries are part of a group of countries with severe weather and useful excavations, economically and economically disadvantaged countries in the past are the smallest countries that are now the most developed.

The main reason for this is that mobilizing the population to inovator , as in Singapore, uses modern technologies, produces and hibernations, produces goods produced in the country, and new promoting the introduction of technology abroad, improving the mechanisms for economic incentives for each family to increase their income, and strengthening the government's financial assistance to mobilize entrepreneurship, to promote the development of farming and unscrupulous farming with all the means, the most important thing is to make the government a new job for the people of the country strengthen public oversight of their seats and improving the quality of life of their lives, and market prices for wages pay special attention to increasing, taking into account.

Ruzvel in the United States , De Gol in France, Turg'ul Ozel in Turkey, and other heads of state, as we have predicted for centuries in the world to drink the economy The world community knows that deep economic and social reforms have passed in their countries and have transformed their countries into large financial centers and provided guaranteed social protection for their people.

"It is no secret that most of the population in areas, especially rural areas, does not have an adequate source of income. As with any country, we have low-income populations. According to Turley calculations, they are approximately 12-15%. The talk in this context is not about small numbers, but about representatives of 4-5 million of our population. Therefore, the problem of social protection for the population is one of the most important tasks facing the leadership of our country, and it is necessary to protect it in terms of social well-being in the country's friendship. It is necessary. Increased benefits for young children, teachers, and the disabled, taking into account the growth of market prices. Especially provide financial assistance to families who have lost a child for various unpleasant reasons, single mothers, pregnant women, until their children reach the age specified in the law. Therefore, it is necessary to carry out social protection for a rural citizen who cannot support himself as a busy but low-income person. To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared. Implementing social protection and providing material assistance to unemployed people who cannot find temporary work until they find work stems from the responsibility of our
